Experience

Stagecoach / Cloud Engineer/ Jan 2023 - Current

- Built an automated platform with the Veeam for AWS API to allow standardised veeam backup appliances within aws to allow the business to have a unified backup environment.
- Introduced Bitbucket pipelines to the DevOps team as well creating a reusable OIDC terraform module for access to the aws environments for an improved security footprint.

Awaze / Infrastructure Engineer/ Sep 2021 - Jan 2023

- Implementing IAC into an operations team, replacing manual tasks with terraform for infrastructure deployments, git for source control and github actions to deploy these changes.
- Designed and deployed the 1Password SCIM bridge into an ECS fargate solution to seamlessly manage groups from AD into 1Password.

Informed Solutions / Infrastructure Consultant/ Nov 2017 - Sep 2021

- Maintenance and enhancements of a Multi environment serverless government project using lambda & ECS Fargate including the CI/CD pipeline, Cloudwatch monitoring and alerting system & supporting of various development teams across all elements of the service.
- One of the multiple client projects I have worked up on required me to migrate a Windows Server 2003 Data centre domain to a Windows Server 2016 AWS security hardened environment migrating over 20000 active directory users / Objects along with all group policy
- Redeployed internal company project tools moving From a windows server environment to a Linux & SQL high availability clustered environment.
- 1st, 2nd & 3rd line support responsibilities for internal & client infrastructure/ systems

One Iota / Technical Support Agent / Aug 2015 - January 2017

- Providing 3rd Line Support for multiple sales channels of some of the largest retailers in the world
- On Site installation & Configuration of Various Signage & Interactive POS Systems
- Quality Assurance of Web Sites, Mobile Applications, Interactive Signage & POS Systems

WDSI International / Technical Support & Engineer / July 2013 - July 2015

- A key part of the engineering team for a full football stadium WiFi installation for fans & internal devices (POS, Ticketing, Signage etc)
- Providing critical support for this installation during worldwide sporting event.
